

# Tylö control panel Pure

## Intuitive design and features

The elegant, compact design of Tylö's Pure control panel makes it the go-to choice for those who value functionality and advanced technology without compromising on aesthetics.

Its ultra-thin black control lights up on touch and lets you set the lighting, temperature and sauna time by simply pressing a few buttons. Of course, choosing the default start time\* means you can step into a wonderfully hot sauna as soon as you get home.

Add a door switch to the Pure control panel to prevent the heater from coming on if the door is open. Dimensions: 86 x 86 mm. IP88.
